

DEPARTMENT PROFILE

Periodontics is the branch of dentistry which provides knowledge and clinical experience dealing with the etiology, diagnosis, management and prevention of periodontal diseases.

The Department of Periodontology was established in 1986 for the undergraduates (B.D.S). Postgraduate course (M.D.S.) in periodontics is offered from the year 1999. Our Department also provides Dental Hygienist diploma course.

The department has separate undergraduate and postgraduate sections equipped with modern dental chairs fitted with ultrasonic scaler unit.

The department offers a wide range of nonsurgical periodontal therapies like ultrasonic scaling and local drug delivery. Surgical therapies for advanced periodontal disease include bone and gingival grafting surgery, regenerative procedures, dental crown lengthening and periodontal pocket reduction procedures. We also provide periodontal plastic, aesthetic, preventive and corrective measures in the management of gingival and periodontal diseases.

Advanced surgical treatment options like dental implants and laser are also offered in the department. The department is well equipped with Implantology unit, Laser unit, piezoelectric surgical unit, microsurgical unit and bone grafts to perform such advanced surgical procedures.

The Department has a library with seventy two reference books and E-library with subscriptions to seven national journals, five international journals and twelve E-journals. The department has a seminar hall with all modern audiovisual aids and internet facility.

STRENGTH OF THE DEPARTMENT

STRENGTH

- Good infrastructure
- Well experienced faculties
- Good patient flow
- Quality patient treatment
- Patient referral from private clinics

FUTURE PLANS OF THE DEPARTMENT

- Establishing centre for excellence
- Research laboratories for stem cell regeneration

The goal of the Department is to provide the undergraduate and postgraduate students with a strong educational foundation in periodontology for their future careers in Dentistry and to contribute new knowledge through basic and clinical research in Periodontics.
